EXPERIENCES

Software Developer

Pythys Software - Kuwait, Kuwait

March 2021 - Ongoing

- Modified existing software to correct coding errors, upgrade interfaces and improve overall performance.
- Worked on creating different websites, from e-commerce to live streaming websites, using Java, Groovy, XML, PostgreSQL, ElasticSearch.
- Worked closely with clients to collect requirements and ensure project quality.
- Developed a live streaming website with a role as a full stack developer. Created a store, streamer dashboard and many other features of the project

Contact Mr. Taher Alkhateeb +965 66561888

Python Developer (Internship)

StarLabs Inc. - Pristina, Kosovo

Feb 2021 - May 2021

- Completed a four-month internship with the python team at StarLabs where I helped on designing and developing a question and answer platform for students in Kosovo.
- Helped on designing database models and developing the backend with the latest technologies(Python, Django, PostgreSQL)
- Was in charge of selecting the technologies used for developing the frontend of the project we were asked to create

Contact Mr. Gentian Demaj - gentiani101@gmail.com

Software Developer (Freelance)

UpWork, PieceX

Jan 2020 - Nov 2020

- Developed a hospital medication management website using technologies - Python, Django, JavaScript, HTML & CSS, and MySQL.
- Worked on an e-commerce website for fashion using image recognition to display recommended clothes to the users. Technologies that were used - Python, Django, OpenCV, Pillow, JavaScript, HTML & CSS, and MySQL.
- Sold three of my games on PieceX, "Tower War Game", "Space Invaders", "Dinosaur Game" that I developed using Python, Pygame, and Turtle.
